

Neha Gokaldas Khobragade

Software Test Engineer

Mobile: +91-9403852752

E-mail: nehakhobragade28@gmail.com

PROFESSIONAL SUMMARY:

QA professional with 3.1 years of IT experience in Test management and Functional testing. Reengineered and facilitated key QA methodologies, processes and metrics standards resulting in increased quality of releases delivered to clients.

PROFESSIONAL SYNOPSIS:

- Overall 3.1 years of Experience on various domain like **Investment Banking** and **Telecom CRM Billing Domain** proficient in Manual Testing.
- Extensive knowledge in Software Development Life Cycle, Testing Concepts and Testing Methodologies.
- Involved in Sanity, Smoke, Retesting, Regression, Integration, Functional testing.
- Involved in analyzing Requirement Documents (SRS) and identify test scenario from Use case. Knowledge of Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC) and Agile Methodology.
- Excellent understanding of Defect status life cycle.
- Experience working in Agile, participated in Scrum Meetings to discuss the Test status report.
- Design the Traceability Matrix to map Business Requirements with test Case.
- Knowledge in using SQL and UNIX as per requirement of project.
- Good interpersonal skills and zeal to learn new technologies and undertake challenge.
- Involved in raising bugs in JIRA as bug Management tools.
- Proficient with **Postman tool** to test the **REST APIs**.

SKILL SET

- Testing Knowledge : Functional testing, Regression Testing ,Integration Testing , Smoke Testing, Database Testing, API Testing.
- Operating System : Windows XP/ 8, Windows10, UNIX.
- Languages : C, C++.
- RDBMS : SQL Server 2008
- Mercury suite : HP.ALM12
- Tools : JIRA, POSTMAN.

PROFESSIONAL WORK EXPERIENCE

- Currently Working as **Software Test Engineer** at **Tata Consultancy Services (TCS)** Pune Since **August 2019 to till date**.

Project 1

Project Name: RBC
Client : Royal Bank of Canada, Canada
Domain : Investment Banking
Role : Functional Testing, Compatibility, Database Testing.

Project Details:

RBC Capital Markets is a premier investment bank that provides a focused set of products and services to corporations, institutional investors and governments around the world. With more than 6,950 professionals, it operates out of 70 offices in 15 countries across North America, the U.K., Europe, and the Asia-Pacific region. It works with clients in over 100 countries around the globe to deliver the expertise and execution required to raise capital, access markets, mitigate risk and acquire or dispose of assets.

Responsibilities:

- Preparing Detailed Test plan, Test Scripts and test cases by understanding the business logic and User Requirements.
- Participated in various phases of testing cycle including: Scoping and Planning, Functional and Regression Testing.
- Understanding the business processes and preparing test scenarios accordingly.
- Generated test scenarios/cases/sets and executed test cases for Regression and System Integration Testing.
- Created test cases to conduct the Positive and Negative testing of the application.
- Creating database queries and checking backend components.
- Prepared various types of report.

Project 2

Project Name : Convergent Charging System (CCS)
Domain : CRM BSS, Billing Support System
Client : Telfort, Netherland
Role : Functional Testing, Manual Testing.

Project Details:

Convergent Charging System is an application that integrates all aspects of the customer relationship lifecycle for Communications Services Providers- Telfort Billing system. Volant is CCS delivers the next generation of convergent services, supporting session and event-based charging with or without unit reservation. Built around the 3GPP specifications, the system supports multiple monetary and non-monetary balances (buckets), which can be shared within a hierarchical structure or between unrelated services. Volant is CCS allows operators to perform real-time authorization, accounting and policy control during service delivery, with a fully compliant Diameter interface for integration with the network and upstream application platforms.

Responsibilities:

- Understanding the SRS document and analyze the requirement. Performed testing implemented on Agile Methodology.
- Involved in preparation of test cases and execution. Execute the test case to validate customer requirement.

- Involved in review test case and send review comments to colleagues.
- Prepared mapping sheet of SRS and test case.
- Log the defect using defect management tool such as JIRA.

CERTIFICATION

- Diploma in Software Testing from Seed InfoTech, Mumbai.

SCHOLASTICS

- **B.E. (Bachelor of Electronics and Communication Engineer)** from **Priyadarshani Institute of Engineering and Technology College**, Under Nagpur university, **Nagpur**.
